

SolarPower Europe

Systems Engineer

Full-time fixed term contract (negotiable)

Location: Brussels, Belgium

Background on SolarPower Europe

SolarPower Europe is a member-led association representing the European solar PV sector. SolarPower Europe's aim is to ensure that more energy is generated by solar than any other energy source by 2030 and lead our members to make solar the core of a smart, sustainable and inclusive energy system.

We are an award-winning association and have over 240 members spanning 35 countries. We aim to produce thought-leading market intelligence, business and policy analysis and support our members through creative and successful advocacy campaigns. We offer a dynamic and exciting working environment within a close-knit and multicultural team in Brussels.

SolarPower Europe aims to build and maintain efficient computer systems and networks to optimize the role of technology on our business sustainability and support our strategy for the industry.

We are recruiting a Systems Engineer that will implement the structural design of our information technology in order to provide optimal information systems solutions for our association.

Job responsibilities:

Reporting to the CFO, the Systems Engineer will oversee the assessment and modeling of our IT solutions:

- Work closely with designers, IT professionals and other team members to choose compatible solutions;
- Ensure our SharePoint and Document Management System integration;
- Provide advice on project design, project costs and expected benefits;
- Research software and hardware needs with team members;
- Collaborate with internal working groups on IT solutions;
- Evaluate existing systems and provide advice on how to meet organizational requirements;
- Coordinate technical components to ensure projects are in sync with the business needs of the organization;
- Train and support non-technical staff in the use of the new IT solutions.

Profile:

The ideal candidate has the following professional profile:

- Minimum Bachelor's degree in computer/software engineering, computer science or other related fields;

- Computer literacy and technical skills with knowledge of programming languages and computer networking;
- Expertise in SharePoint and Microsoft 365 and, in particular, Teams;
- Proficient in applying knowledge to designing IT programmes which solve both human and technical problems;
- A team player who collaborates with other IT professionals and staff members;
- An excellent communicator with interpersonal skills.
- Able to explain complex solutions to non-technical staff in an easy-to-understand manner;
- Sound time management skills. Able to deliver activities and projects within stipulated time.
- Strong planning and organizational skills. Excellent at project management.
- Fluency in English and at least one other EU language; knowledge of additional languages is a plus.

Our offer:

- A F/T Belgian contract with a competitive remuneration package;
- Employee benefits paid by SolarPower Europe make this offer attractive: public transportation allowance, work from home allowance, dental and hospitalization insurance, and lunch vouchers.

Application:

A CV (maximum 2 pages) and a one-page motivation letter should be sent to recruitment@solarpowereurope.org until COB 30 November 2021 quoting “**Systems Engineer**” in the subject line.

Please note that only short-listed candidates will be contacted for an interview.
